REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Wang et al, WO 98/29528, discloses a laundry detergent composition comprising 1-80% by weight of a deterative surfactant, 0.1-80% by weight of an organic or inorganic detergency builder, and from 0.1-8% by weight of a modified cellulose ether (see page 2, lines 14-17). It is further taught by Wang et al that the cellulose ether includes hydrophobically-modified, nonionic materials with anhydroglucose ring alkyl substitution (see page 2, lines 28-31 & page 6, line 8-page 9, line 14). However, patentee differs from applicant in that Wang et al does not teach or suggest in general a detergent composition that contains a mixture of hydrophobically modified cellulosic based polymers and cyclic amine based polymers, per the requirements of the instant invention.

Accordingly, the claims viewed as a whole would not have been obvious to one of ordinary skill in the art at the time of the invention after viewing the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
